CEEC Overseas Investments Company in South America | STRATEGIC FOCUS

Projects in Brazil

Investments - By CEEC OIC

SPSL Water Treatment Plant (São Paulo)

The São Lourenço Water Supply System project in São Paulo represents an investment of approximately US\$900 million. It provides a daily supply of approximately 410,000 tons of water to approximately 2 million residents in the western part of the São Paulo metropolitan region, Brazil.

Photovoltaic plant in the Northeast

The company is investing in a photovoltaic project with an installed capacity of approximately 95 MWp in the Northeast region. The project is scheduled for completion by the end of 2025.

Projects - By CEIG

Belo Monte Transmission Line

This is the first $\pm 800\text{kV}$ UHV DC transmission line in Brazil and the fourth in the world. It was inaugurated in 2020, in the state of Pará (Brazil) and also involved Research & Engineering work (Survey & Engineering).

ROUTE 3 Transmission Line

TL3 (transmission line) was part of Lot 1 of the 800kV UHV transmission project of the third phase of State Grid's Belo Monte Hydroelectric Station, which passes through the states of Goiás, Maranhão, and Tocantins (Brazil). The project also involved the contracting of engineering and a construction agency.

Power plant from solid waste

The unit is the first in Brazil and the largest in Latin America, with a capacity to generate 19 MW of energy from solid waste incineration. The plant is located in the city of Barueri, São Paulo, Brazil.

ESG Commitment

Adopting ESG (Environmental, Social, and Governance) practices is more than a differentiator for CEEC in Brazil. It's a strategic opportunity to innovate, grow, and generate long-term value for both the company and society. We recognize our role in building a more sustainable, fair, and equitable future. Therefore, we are committed to integrating ESG principles into all our operations and decisions.
